Uninterrupted Communication

Master Scan® allows a group of users to seamlessly communicate on not just one channel but a group of channels. If your current channel is interrupted by others outside of the group, all radios in your group will automatically hop to a new clear channel allowing seamless uninterrupted communication to continue.

SMART MIC TECHNOLOGY

- 3-Way Smart Key
- Built-in Dynamic Speaker
- One Touch Control

Choose from 4 different audio settings (Normal, Bass, Midrange and High) to provide a natural Voice Enhancer for super clarity and performance.

Only Uniden can bring you this technology – Voice Enhancer.

* Please note: CH22 & CH23 are used for telemetry and telecommand applications, voice communications are not permitted on these channels and transmission is inhibited. CH61, 62 & 63 are for future use and receive only channels. Specifications subject to change without notice.

† One year warranty for the included accessories.

Within 400-520 MHz band only. This scanner can only listen to and receive unencrypted analogue transmissions.
