Viewtech Corner Alert

Industrial Quality

\\ XS007

Corner Alert Safety System

The Viewtech XS007 provides early warning of approaching vehicles and pedestrians around blind corners.

Warn pedestrians and vehicle operators of potential collisions around blind corners. A bright red warning light on both sides and a loud audible alarm ensures awareness. Strong magnets allow the unit to be attached to warehouse racks, metal shelving or brackets. Magnetic mounting allows for quick adjustment, moving the unit to different locations, and easy access to the battery pack for recharging. For indoor use only.

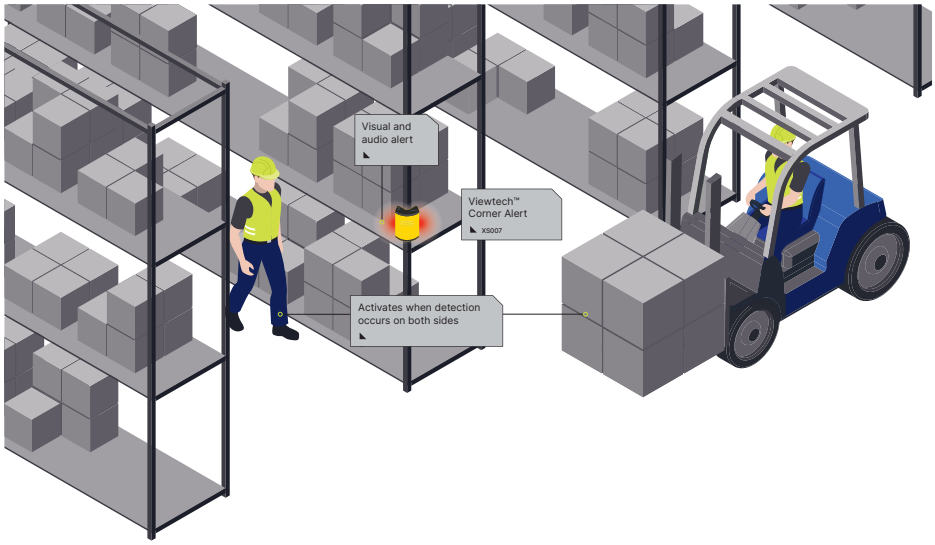

Main Features

- PIR pedestrian and vehicle detection
- Detection range 3.5 – 7.5 m
- Bright warning light
- Loud warning alarm
- Magnetic mounting fits most rack systems
- Battery level indicator
- Adjustable brightness and volume

How it works

If a pedestrian or vehicle is detected on one side of the unit, no alarm is signalled. If a pedestrian or vehicle is deteced on both sides of the unit, the alarm is signalled on both sides.

Specifications	XS007
PIR	Pedestrian & Vehicle Detection
Material	ABS, Steel
Battery	Lithium battery 7.4 V, 5 AH
Rechargeable	USB-C charging port on removeable battery pack
Size	155 × 110 × 210 mm

Enhance safety in warehouse and material handling environments.

From commerical warehouses to manufacturing, distribution and material handling centers, the XS007 provides improved safety around blind corners.

Applications

- Warehouses
- Manufacturing
- Distribution centre
- Material handling
- High-traffic work zones
- Blind corner safety
